Scrum Meeting Document

Date: March 28, 2026
Time: 3:30-4:30
Meeting Type: Discord, type: Sprint review/retrospective and sprint 6 planning

Team Member	Attendance
Owen	☑
Ye	☑
Su	☑
Sultan	☑

Key discussion points:

- Sprint 5 retrospective:
  - Group worked well together getting project done on time
  - We did a good job eliminating code smells, this mindset of continuously improving our codebase served us well
  - Code is in a good place to make M4 implementation quite straightforward
- Sprint 6 planning:
  - Discussed M4 requirements
  - Created frontend schematic quickly in Paint to break down the workload

  - Additional functionality ideas:
    - Wallet system like uber eats
    - Tip system
    - Order rating

        - Add favourite restaurants for users so they can easily see their menus
        - Restaurants can set menu items as available or not
        - Giving customers an address book so they can fill in their saved addresses
        - Promo codes which can be created by admin
        - Menu item combos (deals if you buy certain combinations of stuff)
    - Decided that we want to implement frontend using simple HTML and React
    - Goal is to finish M4 coding by 11:59 April 3rd

Action items / Responsibilities:

- Owen to send list of additional functionality ideas to TA for approval
- Create issues in github for these components
- For frontend implementation (divided by core feature):
    - CF1 - Ye
    - CF2 - Owen
    - CF3 - Ye
    - CF4 - Sultan
    - CF5 - Sultan
    - CF6 - Su
    - CF7 - Su
    - CF8 - Owen
    - Admin page - Ye
